

## Work experience

### Yolando

#### Senior Product Designer

Sep 2025 - Present

- **Led 0→1 product design** for an AI-powered generative search engine optimization platform, transforming an early concept into a launched product.
- **Defined design-engineering collaboration and handoff processes**, including organized design files, documentation, and implementation guidelines.
- **Established a scalable design system using shadcn/ui**, including reusable components and developer handoff documentation.
- **Leveraged AI-assisted prototyping (Claude Code)** to rapidly explore product ideas and interaction patterns before translating validated concepts into structured Figma components and design tokens.
- Created **Yolando's brand identity, marketing website (Framer), and go-to-market materials** from scratch, establishing the product's visual identity and market presence.

### Rose Rocket

#### Product Designer II / Product Designer

Sep 2023 - Sep 2025

- **Owned and scaled the Rose Rocket design system**, establishing reusable UI patterns adopted across product and engineering teams.
- Designed enterprise configuration tools (Object Builder, Automation Builder) reducing setup time from hours to minutes and contributing to **22 deals and \$400K+ ARR**.
- Launched an automated Rating Engine replacing manual workflows, **increasing usage 772% and generating \$4.4M+ ARR within two months**.
- Led a **frontend platform rebuild initiative** improving accessibility, performance, and developer velocity.

#### Associate Product Designer

Sep 2021 - Sep 2023

- Designed growth and operations tooling including **Network Inbox, notifications, and email integrations**.
- Expanded the Zinnia design system and improved onboarding workflows to support product adoption.

### Ubisoft Toronto

#### UX Design Intern

May 2020 - Dec 2020

- **Designed and implemented gameplay tutorials** to help players onboard and learn controls for Far Cry 6.
- **Produced detailed design documentation**, wireframes, and UI layouts in collaboration with game designers and programmers.

#### UI Artist Intern

June 2019 - Aug 2019

- **Developed in-game iconography** and HUD artwork, contributing to the visual identity of Far Cry 6.

## About me

Product designer specializing in AI products and complex platforms. Experienced in 0→1 product design, design systems, and developer collaboration. Proven track record turning ambiguous ideas into scalable, shipped enterprise and AI-driven products.

## Education

### University of Toronto

**Master of Information** 2019-21

User Experience Design

**Honours BSc.** 2014-18

Toxicology & Nutrition

## Expertise

### Core skills

Product Strategy, 0→1 Product Design, Design Systems, Design Tokens, Interaction Design, Information Architecture, Developer Handoff

### Tools

Figma, Framer, Claude Code, ChatGPT, shadcn/ui, Storybook, HTML, CSS

### Process

User Research, Usability Testing, AI-assisted Prototyping, Vibe Coding, Rapid Feature Exploration

## Interests

Design systems, video games, photography & brewing the perfect cup of espresso
